Home: Jinnah gate pasrur District Sialkot Wapda Town Lahore, 54000 Lahore (Pakistan)

ABOUT ME

Senior Full-Stack .NET Developer with 7+ years of experience in designing, developing, and deploying enterprise-grade applications. Specialized in **.NET Core / .NET 8, Microservices Architecture, Angular, React.js, and Azure cloud services**. Experienced in building **scalable, loosely coupled microservices-based systems**, implementing RESTful APIs, service-to-service communication, and cloud-native solutions using Docker, Kubernetes, and Azure. Proven track record of delivering **secure, high-performance solutions** across fintech, government, and enterprise domains. Currently focused on integrating **AI/ML capabilities** using OpenAI, Python, and Azure AI services to develop intelligent, automated, and data-driven systems.

WORK EXPERIENCE

Abu Dhabi Ports – Abu Dhabi, United Arab Emirates

Software Engineer

[3 Jan 2025 – Current]

- Developed and maintained **microservices-based applications** using **.NET Core / .NET 8 Web APIs**
- Designed and implemented **RESTful APIs** for integration with internal and external systems
- Built and enhanced **frontend components using Angular**, ensuring responsive and user-friendly UI
- Implemented **secure authentication and authorization mechanisms** following enterprise standards
- Worked with **Azure cloud services** for deployment, monitoring, and scalability
- Applied **Clean Architecture and CQRS patterns** to improve system maintainability
- Optimized database performance using **SQL Server and Dapper**
- Collaborated with cross-functional teams (QA, DevOps, Business) to deliver features on time
- Troubleshoot and resolved **production issues**, ensuring system stability
- Contributed to **CI/CD pipelines** for automated build and deployment

Ministry of Human Resource and Emiratization – Dubai, United Arab Emirates

Full Stack Developer

[5 May 2023 – 4 Feb 2025]

Main Activities and Responsibilities:

- Designed, developed, and maintained **mission-critical enterprise applications** for a UAE government entity using **.NET Core / .NET 8, C#, SQL Server, and Oracle**
- Engineered and integrated **secure RESTful APIs** for seamless data exchange with internal and external government systems, ensuring compliance with strict security protocols
- Implemented authentication mechanisms including **EIDA-based OTP validation** and **IP whitelisting** to prevent unauthorized access
- Developed **Role-Based Access Control (RBAC)** systems to enforce data security and compliance with government IT policies
- Built and optimized the **MOHRE Wallet application**:
 - Developed responsive and user-friendly frontend using **React.js and Vue.js**
 - Architected backend services using **.NET 8**, integrating secure payment gateways and real-time transaction processing
- Optimized database performance through **complex queries, stored procedures, and triggers** in SQL Server and Oracle

- Automated key government workflows such as **employment visa processing** and **labor contract management** via API integrations
- Collaborated within **Agile cross-functional teams** to deliver end-to-end solutions from development to UAT and production deployment

Technical Environment:

.NET 8, C#, ASP.NET Core, React.js, Vue.js, SQL Server, Oracle, OAuth, JWT, EIDA, Azure, IIS, Git, Jira, Power BI

 **EBizCharge** – Remote, Pakistan

Software Engineer

[10 Apr 2022 – 12 Feb 2023]

Main Activities and Responsibilities:

- Engineered a **scalable, high-volume Accounts Payable Automation module** using **microservices architecture**, improving system resilience and enabling independent deployment cycles
- Developed mission-critical financial features including **payment gateway integrations, automated invoice processing, and vendor management systems** in a **PCI DSS compliant environment**
- Built a **high-performance frontend** using **Telerik UI for Blazor**, delivering responsive and feature-rich interfaces for complex financial workflows and data visualization
- Implemented **high-speed inter-service communication** using **gRPC**, significantly improving real-time data processing performance compared to traditional REST-based approaches
- Designed and optimized **SQL database structures** to support high-throughput financial transactions and reporting
- Ensured **secure handling of sensitive financial data**, adhering to industry compliance and best practices
- Collaborated with cross-functional Agile teams to deliver scalable fintech solutions from development to production

Technical Environment:

.NET Core / .NET 8, C#, Microservices Architecture, gRPC, Blazor, Telerik UI, SQL Server, Payment Gateway Integration, PCI DSS, Azure, Git, Jira

 **Telebu Communication** – Remote, Pakistan

Technical Solution Consultant

[23 May 2022 – 12 Dec 2022]

Main Activities and Responsibilities:

- Designed and developed **custom IVR (Interactive Voice Response) systems** using Telebu Communications to automate customer interaction processes
- Implemented **multi-level IVR menus**, enabling efficient navigation and improved user experience
- Developed **smart call routing and automated call distribution (ACD)** to handle high call volumes and optimize call center operations
- Built and managed **outbound calling campaigns**, improving customer engagement and communication efficiency
- Integrated IVR systems with **CRM and ticketing platforms** for seamless data synchronization and enhanced customer support workflows
- Utilized **real-time analytics and reporting** to monitor system performance and user behavior
- Ensured **scalability, security, and high availability** of communication systems

Technical Environment:

Telebu, IVR Systems, API Integration, CRM Integration, Call Routing, Call Center Automation, Analytics

 **Microsoft** – Lahore, Pakistan

Software developer

[2 May 2021 – 22 May 2022]

Main Activities and Responsibilities:

- Architected and executed **modernization of Accounts Payable and Receivable modules**, migrating legacy systems from Visual FoxPro to **.NET Core and Angular 14**
- Reverse-engineered legacy business logic and data structures to ensure **data integrity, functional accuracy, and improved performance**
- Developed scalable backend services using **.NET Core Web APIs** and built responsive frontend applications with **Angular 14**
- Implemented **event-driven architecture** using RabbitMQ (producer-consumer pattern) and leveraged **Kafka and Redis** for high-performance messaging and caching
- Configured and maintained **CI/CD pipelines on Azure**, enabling automated build and deployment processes
- Applied both **Database-First (Dapper ORM)** and **Code-First approaches** for efficient and scalable data management
- Customized **SharePoint Online solutions** using SPFx, Power Automate, and client-side scripting to enhance collaboration and workflow automation
- Improved system scalability, reduced operational costs, and delivered a **secure and future-ready platform**

Technical Environment:

.NET Core, ASP.NET Web API, Angular 14, Azure, CI/CD, Dapper ORM, RabbitMQ, Kafka, Redis, Docker, Linux, IAM, Amazon S3, Amazon EC2, RDLC, SharePoint Online, SPFx, Power Automate

 **Techverx** – Lahore, Pakistan

Software Engineer

[9 Oct 2021 – 14 Apr 2022]

Main Activities and Responsibilities:

- Led the **end-to-end development** of “BNB Yacht,” a greenfield web application for the US market, enabling **boat chartering and event venue booking**, from concept to production deployment
- Architected a **scalable microservices-based solution** using the **ABP Framework**, implementing advanced patterns prior to official microservices support
- Developed **.NET-based microservices APIs** to manage booking workflows, user management, and payment processing with high reliability and performance
- Built a **responsive and modern frontend** using **Angular 14 and Angular Material**, ensuring an intuitive and seamless user experience
- Implemented and optimized **CI/CD pipelines using Jenkins**, automating build, testing, and deployment processes on AWS cloud infrastructure
- Deployed and managed applications on **AWS services (EC2, S3, RDS)**, ensuring scalability and system availability
- Collaborated within **Agile cross-functional teams**, contributing to code reviews, mentoring junior developers, and delivering features in a fast-paced environment

Technical Environment:

.NET Core / .NET 5, Microservices Architecture, ABP Framework, Angular 14, Angular Material, REST APIs, Jenkins, CI/CD, AWS (EC2, S3, RDS), Docker, Git, SQL Server, PostgreSQL

 **University of Sialkot** – Sialkot, Pakistan

Junior Software Developer

[7 Jul 2018 – 15 Apr 2020]

Main Activities and Responsibilities:

- Designed, developed, and maintained key modules of a **university ERP system** using **ASP.NET MVC**, streamlining administrative workflows and centralizing data management across departments
- Developed a comprehensive **Learning Management System (LMS)** supporting course material distribution, assignment submissions, grading, and student-teacher communication
- Engineered an **Employee Management System (EMS)** to automate HR processes, including employee records, attendance tracking, payroll integration, and performance evaluation, improving operational efficiency
- Built a **Library Management System** to automate cataloging, book issuance/returns, fine calculation, and member management, enabling real-time inventory tracking
- Implemented **Role-Based Access Control (RBAC)** to ensure data security and controlled access for students, faculty, and administrative staff
- Designed and optimized **relational databases** using SQL Server, including stored procedures and views for reporting and data processing
- Utilized **Entity Framework** for efficient data access and management
- Developed **responsive and user-friendly interfaces** using Razor views, HTML5, CSS3, Bootstrap, and jQuery
- Collaborated with stakeholders to gather requirements and deliver scalable solutions aligned with academic and administrative needs

Technical Environment:

ASP.NET MVC, C#, Entity Framework, SQL Server, JavaScript, jQuery, HTML5, CSS3, Bootstrap, REST APIs, TFS, Git

EDUCATION AND TRAINING

Bachelor of Science in Computer Science (BSCS)

University of Gujrat, Pakistan [6 Sep 2015 – 4 Jun 2019]

City: Gujrat | Country: Pakistan | Field(s) of study: Computer Science | Level in EQF: EQF level 6

LANGUAGE SKILLS

Mother tongue(s): Urdu | Panjabi; Punjabi

Other language(s):

English	Arabic
LISTENING C1 READING C2 WRITING B2	LISTENING A2 READING A2 WRITING B1
SPOKEN PRODUCTION C2 SPOKEN INTERACTION C1	SPOKEN PRODUCTION B1 SPOKEN INTERACTION B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DRIVING LICENCE

Driving Licence: B	20 Jun 2025 – 20 Jun 2027
---------------------------	---------------------------

CERTIFICATIONS

[Ministry of Human Resources and Emiratisation, 14 Jul 2024]
Appreciation Certificate for MOHRE Honored with a Certificate of Appreciation from the Ministry of Human Resources and Emiratisation (MOHRE) for significant contributions, problem-solving abilities, and commitment to delivering efficient and reliable solutions.
Mode of learning: Work based
