7+ Years

PROFESSIONAL SUMMARY

Lead Full Stack Engineer with **7+ years** delivering secure, scalable payroll and payment platforms across fintech, government and enterprise. Expert in **Go (Golang)**, **Vue.js**, **Angular**, **React.js**, **.NET 8** and **Azure** cloud-native architectures. Proven ability to lead engineering teams, architect PCI DSS-compliant systems, implement OAuth 2.0 / JWT security and drive high-impact digital transformation at scale.

PROFESSIONAL EXPERIENCE

Lead Full Stack Engineer

Jan 2025 – Present

Abu Dhabi Ports — Remote

- Leading architecture and development of secure, scalable payment and workflow platforms using Go (Golang), .NET 8, Vue.js and Angular.
- Designing Azure cloud-native deployments with Docker, Kubernetes and CI/CD pipelines for zero-downtime enterprise releases.
- Implementing OAuth 2.0 / JWT and RBAC security across distributed microservices handling mission-critical port operations data.
- Driving engineering standards, conducting cross-team code reviews and mentoring mid-level engineers.

Senior Software Engineer

May 2023 – Feb 2025

Ministry of Human Resources & Emiratisation — UAE

- Delivered mission-critical government payroll and MOHRE Wallet modules serving hundreds of thousands of employees across the UAE.
- Implemented EIDA OTP authentication, advanced RBAC and secure API integrations across the national government platform.
- Led workflow automation initiatives reducing manual processing time by 60% across multi-team digital transformation programs.

- ▶ Awarded Certificate of Appreciation by the Ministry (Jul 2024) for outstanding engineering contributions.

Software Engineer – Fintech & Payments

Apr 2022 – Feb 2023

EBizCharge — Remote

- ▶ Designed and built a high-volume payroll and accounts payable payment platform using Go (Golang) microservices and gRPC.
- ▶ Implemented PCI DSS-compliant architecture processing large-scale payment and payroll transactions with full audit trails.
- ▶ Built Vue.js and Blazor/Telerik UI components for real-time payment dashboards and transaction monitoring interfaces.
- ▶ Integrated OAuth 2.0 / JWT flows across all distributed payment services ensuring end-to-end encryption and compliance.

Technical Solutions Consultant

May 2022 – Dec 2022

Telebu Communications — Remote

- ▶ Architected IVR, call routing and campaign automation systems integrated with CRM and ticketing platforms.
- ▶ Built analytics dashboards using React.js and Vue.js with real-time data pipelines for campaign performance reporting.

Software Developer

May 2021 – May 2022

Macrosoft — Lahore, Pakistan

- ▶ Led full legacy modernization from Visual FoxPro to .NET Core + Angular, reducing technical debt and improving performance 3x.
- ▶ Implemented event-driven messaging with RabbitMQ, Kafka and Redis, deployed via Azure DevOps CI/CD pipelines.

Junior Software Developer

Jul 2018 – Apr 2020

University of Sialkot — Sialkot, Pakistan

- ▶ Built ERP, LMS, EMS and Library Management systems using ASP.NET MVC, Entity Framework and SQL Server for 3,000+ users.
- ▶ Implemented role-based access control, automated reporting modules and audit log systems.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

University of Gujrat

Sep 2015 – Jun 2019 · Gujrat, Pakistan

CERTIFICATIONS & AWARDS

🏆 Certificate of Appreciation

Ministry of Human Resources & Emiratisation, UAE
Issued July 2024 — in recognition of outstanding engineering contributions to national digital infrastructure.
